

# THE MAGIC VALVE

## BOB NEAL'S EQUALIZER

### CONTENTS

Patent drawing of engine, equalizer and tank.....	inside front cover
E-mail from website debunking perpetual motion .	inside back cover
Modified Neal Compression Unit, drawing.....	outside back cover
The Storm in a Tank .....	1
Modified Neal Compression Unit, project outline .....	5
Interview with air car inventor George Heaton.....	8
Interview with Bob Neal's son.....	9
Bob Neal's complete patent.....	14
Chain of invention–the first engine to Bob Neal's equalizer .....	19
Resonance in closed-ended pipes.....	21
Scavenging and supercharging.....	22
Huyghens, Savery and the first engines .....	27
Check valves and their effect on pulsations.....	37
Fluid transients in fluid structure interaction .....	40
The chattering of safety valves and similar mechanisms .....	47
The dynamic behaviour of non-return valves.....	51
Dynamic response of check valves.....	62
Critical analysis...dynamic characteristics of non-return valves.....	73
High velocity oscillating jet generated by waterhammer .....	84
Check valve dynamics in pressure transient analysis.....	90
Theory of compressible flow through reed valves for pulse jets .....	96
Result of my attempt to get Neal's file from patent office .....	101
US Patent file (wrapper) #2,030,7059, Bob Neal .....	102
