

# ROTARY PRESSURE EXCHANGERS

These machines are being used as superchargers in truck engines. They are equalizers—a type of dynamic pressure exchanger—whose function is to use hot pressurized gases to heat and pressurize lower energy gases. Acoustic waves scavenge and fill cells in a rotor. It seems to me that these could be of some use in an alternative air compression system.

<b>PART ONE: Scientific articles from journals .....</b>	<b>1-86</b>
foreword from <i>Machinery for Direct Fluid-fluid Energy Exchange</i> , J. F. Sladky .....	1
“Pressure Exchange,” Joseph V. Foa .....	2
“Cryptosteady Modes of Direct Fluid-Fluid Energy Exchange,” J. V. Foa and C. A. Garris .....	5
“Internal Modes of Cryptosteady-Flow Energy Separation, L. Xia and J. V. Foa .....	17
“Cryptosteady-Flow Energy Separation,” J. V. Foa .....	20
“An Introduction to the Dynamic Pressure Exchanger,” P. H. Azoury .....	23
“The Performance of Pressure-Exchanger Dividers and Equalizers,” J. A. C. Kentfield.....	42
“The Principal of the Pressure-Wave Machine as used for Charging Diesel Engines,” Nic Croes.....	51
“Wave Rotors for Turbomachinery,” R. Taussig and A. Hertzberg .....	60
“Supercharging with Compres,” M. Berchtold .....	66
<b>PART TWO: Patents from 1936-1960 .....</b>	<b>87-154</b>
Process of and apparatus for performing conversions of mechanical and thermal energy, A. F. Lebre, 1936.....	87
Pressure exchangers, C. Seippel, 1946 .....	98
Gas turbine installation, C. Seippel, 1949 .....	107
Pressure exchange apparatus, G. Darrieus, 1950 .....	112
Pressure exchanger with combined static and dynamic pressure exchange, A. W. Hussmann, 1956.....	115
Jet reaction propulsion units utilizing a pressure exchanger, G. Jendrassik, 1956 .....	126
Pressure exchangers, G. Jendrassik, 1956.....	131
Pressure exchangers, G. Jendrassik, 1956.....	139
Pressure exchangers and applications thereof, G. Jendrassik, 1960 .....	146
